## Industrial Hose

| Type (mm) | Film thickness (mm) | Vacuum degree (M-H <sub>2</sub> O) | Bending radius(mm) | Weigh (kg/m) | Single length (m) |
|-----------|---------------------|------------------------------------|--------------------|--------------|-------------------|
| Ø 100     | 0.9-1.0             | 0.3                                | 125                | 0.8          | 20                |
| Ø 150     | 0.9-1.0             | 0.2                                | 190                | 1.26         | 15                |
| Ø 250     | 0.9-1.0             | 0.1                                | 260                | 1.94         | 10                |
| Ø 500     | 0.9-1.0             | 0.04                               | 550                | 5.10         | 10                |

Notes: The above is the parameter table for the slyphon bellows of one specification model, and others can be customized according to the user requirements.
